Frill Seeker Scarf

Materials: 1 ball Estelle Frill Seeker
6mm needles (preferably with sharp tip)
Darning needle

To cast on, hold end of Frill Seeker spread out in front of you with the ball to your left. Insert needle from front to back approximately ¼” from top edge. Bring needle over yarn and insert again from front to back approximately 1 ½” to the left. Repeat this step another 7 times. 9 sts total.

Turn work. With right needle insert tip through loop on left needle (**on first row only** it may be easier to insert needle through back loop). Unfurl a length of Frill Seeker and insert tip of left needle approximately ¼” from top of strand approximately 1 ½” from left needle. The rule of thumb as to what distance you should have between stitches is to use the length of your thumb as a guide. Continue knitting every row until scarf is desired length, leaving enough to cast off.

Cast off **extremely** loosely. Even though it looks overly exaggerated, the looser the better to prevent the end of the scarf from puckering. With darning needle, weave end through cast off row.

For information and videos on how to knit with yarns similar to Estelle Frill Seeker, go to youtube.com and search for Frill Seeker Scarf or key the link below into your browser.

Note: If you need to join two ends together, overlap the two ends approximately 4” and knit through both layers.
